WE INVITE YOU TO JOIN THE NATIONAL SCIENCE TEACHERS ASSOCIATION

as a college science teaching professional and, as one of your member benefits, to receive the

JOURNAL OF
COLLEGE SCIENCE TEACHING

Editor: Leo Schubert
Professor of Chemistry
The American University

Now in its seventh year of publication, this critically acclaimed Journal has as its editorial objectives:

- To deal with various aspects of scientific literacy: the nature of science and the scientific disciplines; the relationships between science and society; the science-technology overlap; and the responsibilities of scientists.
- To stress those contributions concerned with the first two years of college science instruction.
- To present an exchange of ideas and experiences on interdisciplinary and multidisciplinary courses of study in science, particularly those for non-science majors.
- To provide a forum for critical reports and discussions of innovative college science teaching.
- To provide information on unconventional media and new teaching materials, methods, and evaluative criteria.
- To present philosophies and techniques of related fields.
- To publish articles of general interest on educational problems.
- To provide information on numbers and characteristics of college science students and teachers.
- To serve as a forum for controversial subjects relating to science education.
- To publish material in a single discipline broad enough in its approach to have interest and application to teachers in other fields.

MEMBERSHIP FORM

NATIONAL SCIENCE TEACHERS ASSOCIATION
1742 Connecticut Avenue, N.W.
Washington, D.C. 20009

Please indicate form of payment below and fill in current address.

☐ My check, payable to NSTA, is enclosed.

☐ Please bill. Canadian and foreign postage $1.25 additional.

_____
(Name)

_____
(Address)

_____
(City) (State) (Zip)

Annual dues of $20 includes membership in NSTA and subscription to the *Journal of College Science Teaching* (five issues each academic year)

JOURNAL OF RESEARCH IN SCIENCE TEACHING

Contents

Volume 14, 1977

ISSUE 1, JANUARY

Research Papers

- The Use of Behavioral Objectives in Instruction of Basic Vocational Science Students: *William Joseph Martin* 1

Research Reports

- The Influence of Science Training on Student Achievement in the Age Range 8–10 Years Old: *T. J. Harvey* 13
- Cognitive Development and Science Teaching: *George Oleh Kolodiy* 21
- Adapting Instruction to Student Differences in an Individualized Science Program: *Daniel S. Sheehan and Ronald K. Hambleton* 27
- The Influence of Structured versus Unstructured Laboratory on Students' Understanding the Process of Science: *Jaqueline Spears and Dean Zollman* 33
- The Comparison of the Inquiry Behavior of ISCS and Non-ISCS Science Students as Measured by the TAB Science Test: *Everett S. Stallings and William R. Snyder* 39
- A Study of the Interrelations of Attitude and Achievement Measures in an Audio-Tutorial College Chemistry Course: *John W. Butzow, L. William Linz, and Roy A. Drake* 45
- Instructional Adjuncts and Learning Science from Written Materials: *A. Joseph Santiesteban and John J. Koran, Jr.* 51
- The Effect of Two Science Programs (ESS and Laidlaw) on Student Classification Skills, Science Achievement, and Attitudes: *Eugenia Poporad Vanek and John J. Montean* 57
- A Factor-Analytic Investigation of Meyer's Test of Interests: *A Hofstein, R. Ben-Zvi, D. Samuel, and R. F. Kempa* 63
- Conservation Reasoning Ability and Performance on BSCS Blue Version Examinations: *Anton E. Lawson and Floyd H. Nordland* 69
- The Stability of Student Perception of the Classroom Learning Environment: *Frances Lawrenz* 77
- The Effect of Process-Skill Instruction on Performance on Preservice Elementary Teachers: *William R. Brown* 83

Position Papers

- Application of Science Education Research to the Classroom: Validating Science Teacher Training through Student Performance: *John J. Koran, Jr.* 89

Issue 2, March

Research Papers

- The Use of Rewritten Science Materials in Ninth-Grade Biology: *Noble R. Corey* 97
- The Effect of Kinetic Structure on Achievement and Total Attendance Time in Audio-Tutorial Biology: *Philip M. Mathis and John W. Shrum* 105
- Hierarchical Learning in Electrical Science: *Geoffrey W. Beeson* 117
- Differential Cognitive and Affective Responses to Flow Diagrams in Science: *William G. Holliday, Lawrence L. Brunner, and Edward L. Donais* 129

Research Reports

- The Effect of Essay Writing on the Attitudes of Undergraduate Science Methods Students: *Donald P. Kauchak* 139
- Development and Validation of a Science Teacher Needs-Assessment Profile: *Kenneth D. Moore* 145
- Assessing a Competency-Based Physics Course: A Model for Evaluating Science Courses Servicing Elementary Teachers: *Glenn Markle and William Capie* 151
- Correlations Among Course Activities Used to Evaluate Elementary Science Teacher Interns: *Lila F. Wolfe* 157

Comments and Criticism

- Comment on "The Proper Experimental Unit: Comparative Analyses of Empirical Data": *Leo H. T. West* 163
- On Reviewing Literature and Reporting Research Findings: Comments on "Effects of Modeling on Preservice Science Teachers During ISCS Microteaching Sessions": *John J. Koran, Jr.* . 167

Position Papers

- Science Teaching and the Development of Reasoning: *Robert Karplus* 169

Issue 3, May

Research Papers

- A Path-Analysis Model of Secondary Physics Enrollments: *Lee T. Bryant and Rodney L. Doran* 177
- A Study of Student Classroom Behavior and Self-Preception as it Relates to Problem Solving: *James A. Shymansky, John E. Penick, Charles C. Matthews, and Ronald G. Good* 191
- Acquisition of Science Teaching Skills through Psychological Modeling and Concomitant Student Learning: *A. Joseph Santiesteban and John J. Koran, Jr.* 199
- The Effects of Model Viewing with Systematic Strategy Analysis on the Science Teaching Styles of Preservice Teachers: *Russell Yeany, Jr.* 209
- An Evaluation of Alternative Systems for Implementing Curriculum Change: *Wayne W. Welch and Victor L. Willson* 223

Research Reports

- Influencing the Planning of Teachers with Instruction in Science Process Skills: *Richard L. Campbell and James R. Okey* 231

- Development Trends in the Continued Word Associations of Physics Students: *Peter F. W. Preece* 235
- Some Correlates of the Choice of Educational Streams in Israeli High Schools: *Avi Hofstein, Ruth Ben-Zvi, David Samuel, and Richard F. Kempa* 241
- Teaching Children to Control Variables: Investigation of a Free-Choice Environment: *Marcia C. Linn, Benjamin Chen, and Herbert D. Thier* 249
- Effects of Learning Structure Condition on Change in Preference for Science Courses: *Frank E. Crawley and John W. Shrum* 257

Position Papers

- Heuristic Learning and Science Education: *J. Richard Suchman* 263

ISSUE 4, JULY

Research Papers

- Moral Valuing and Environmental Variables: *Raymond G. Dispoto* 273
- The Effects of Cooperation and Competition on Student Reactions to Inquiry and Didactic Science Teaching: *Dean Tjosvold, Paul M. Marino, and David W. Johnson* 281

Research Reports

- The Effect of a Science Methods Course on the Philosophical View of Science among Elementary Education Majors: *James P. Barufaldi, Lowell J. Bethel, and William G. Lamb* 289
- The Effects of the Science Curriculum Improvement Study on a Child's Self-Concept: *Gerald H. Krockover and Marshall D. Malcolm* 295
- Validation of a Questionnaire Used to Determine a Philosophical View of Science Held by Preservice Elementary Teachers: *William G. Lamb* 301
- The Effects of Auto-Tutorial Science Process Instruction on Teacher Achievement and Its Relation to Specific Undergraduate Majors: *Frank S. Romero* 305
- How Are the Laboratories Used?: *Pinchas Tamir* 311
- The Function of Professional Reinforcement in Supporting a More Positive Attitude of Elementary Teachers toward Science: *Robert L. Shrigley* 317
- The Comparative Effects of Institutes for Changing the Philosophy of Teaching Elementary School Science among Teachers and Administrators: *David R. Stronck* 323
- A Cross-Cultural Study of Piagetian Concrete Reasoning and Science Concepts among Rural Fifth-Grade Mexican- and Anglo-American Students: *R. Lloyd Brown, James F. Fournier, and Richard H. Moyer* 329
- The Effect of Differentially Sequenced Individualized Instructional Materials on Student Achievement in Biology: *Claudia B. Douglass and Jane B. Kahle* 335
- The Effect of the BSCS Inquiry Slides on the Critical Thinking Ability of First-Year High School Biology Students: *Lloyd Story, Jr. and Iva D. Brown* 341
- The Experience of Professional Groups and Their Values for Instruction: *Abraham Sagiv* ... 347
- The Effect of Question-Asking Instruction on Preservice Elementary Science Teachers: *Dale R. Rice* 353

Comments and Criticism

- The Karplus Islands Puzzle, Volume with Metal Cylinders, and Other Problems: *Darrell G. Phillips* 361

Position Papers

- Scientific Reasoning Ability in Adolescence: Theoretical Viewpoints and Educational Implications: *David I. Levine and Marcia C. Linn* 371

ISSUE 5, SEPTEMBER

Research Papers

- The Effects of Grouping and Pacing on Learning Rate, Attitude, and Retention in ISCS Classrooms: *Dorothy Gabel and J. Dudley Herron* 385
- Teaching Methods, Intelligence, and Gender Factors in Pupil Achievement on a Classification Task: *Don Ryman* 401
- A Survey of Proportional Reasoning and Control of Variables in Seven Countries: *Robert Karplus, Elizabeth Karplus, Marina Formisano, and Albert-Christian Paulsen* 411
- The Long-Term Effects of Mandated Curriculum Adoption on Teaching Behavior: *James Orgren* 419

Research Reports

- The Effects of Teacher Behavior on Student Behavior in Fifth-Grade Science: A Replication Study: *John E. Penick and James A. Shymansky* 427
- Modes of Instruction in High School Chemistry: *Ruth Ben-Zvi, Avi Hofstein, David Samuel, and Richard F. Kempa* 433
- The Effects of Structure in Science Communications on Knowledge Acquisition and Conceptual Organization by Students of Varying Mental Maturity: *E. Ferraro, M. T. Lee, and O. R. Anderson* 441
- Relation of Productivity in Elementary School Science to Token Reinforcement Involving Liked and Unliked Peers: *Clifford H. Edwards* 449
- Self-Concept and Attitudes as Factors in the Achievement of Preservice Teachers: *Richard L. Campbell and Luis Martinez-Perez* 455
- Strategies Used by First-Grade Children in Ordering Varying Numbers of Objects by Length and Weight: *Edward L. Smith and Michael J. Padilla* 461
- Promoting the Development of Logical Thinking in the Classroom: *Ann C. Howe and Janice Mierzwa* 467

Comments and Criticism

- Some Comments on Aikenhead's "New Methodology for Test Construction": *Ronald K. Hambleton* 473

Position Papers

- Students' Characteristics and Instructional Outcomes: *Pinchas Tamir* 477

ISSUE 6, NOVEMBER

Research Papers

- Does Video-Autotutorial Instruction Improve College Student Achievement?: *K. M. Fisher, H. Guenther, B. MacWhinney, P. Sorensen, and D. Stewart* 481
- A Test of Piaget's Metric Proportionality Construct Using Ordering Theory: *Paul W. Rogers* 499

- A Factor-Analytic Approach to Needs Assessment: *Jacob W. Blankenship and Kenneth D. Moore* 507
- Learning for Mastery versus Personalized System of Instruction: A Comparison of Remediation Strategies with Secondary School Chemistry Students: *David H. Swanson and Jon J. Denton* 515

Research Reports

- Science Teachers' Flexibility: *James Reed Campbell* 525
- An Investigation of Two Methods of Science Instruction and Teacher Attitudes towards Science: *H. Marvin Bratt* 533
- Measurement of Logical Thinking: An Electronic Equivalent of Piaget's First Chemical Experiment: *Frederick P. DeLuca* 539
- Open-Mindedness and Attitudes about Teaching Science: *Barbara M. Strawitz* 545
- The Influence of Computer-Managed Self-Paced Instruction on Science Attitudes of Students: *Carlton W. Knight II and Gary E. Dunkleberger* 551
- Should Science Be Used to Teach Mathematical Skills?: *Sandra P. Kren and John P. Huntsberger* 557

Comments and Criticism

- Reproducibility and Learning Hierarchies: A Clarification: *Richard J. Hofmann* 563
- Comments on "An Empirical Derivation of Hierarchies of Propositions Related to Ten of Piaget's Sixteen Binary Operations": *Richard Bady* 571
- Comments on Benefield and Capie's Propositional Hierarchies: *David Moshman* 575

Book Reviews

- Attitude Goals in Secondary School Sciences, by Sally Brown. Reviewed by *Richard Hansen* 579
